

# Kids MoD PAH Study Participant Journey

Principal Investigator: Lewis H. Romer, MD  
IRB Protocol Number: IRB00300590

Led by:

## What is Part of Regular Medical Care

### Your child:

- will take medicines to treat PAH
- will have clinic visits every 3 months
- will have regular echocardiogram (echo) ultrasounds and lab tests
- may have additional labwork

## What is Part of Research:

### Study Activities

- placement into 1 of 2 medical treatment groups (please see brochure)
- keep medication diary on mobile app
- wear study-supplied watch to measure activity level
- answer questions about how your child is feeling
- may have some additional lab tests
- study team will check in with you by phone between clinic visits

### Potential Benefit

- team is using the most advanced tracking of how PAH medicines are working for your child

### KIDS MOD PAH PODCAST

Scan QR with smart phone to listen to a brief podcast where Dr. Lewis Romer discusses the importance of clinical trials in the pediatric pulmonary hypertension population and his work on the PPHNet's Kids MoD PAH Trial: Mono- vs. Duo-Therapy for Pediatric PAH patients.
